

LOCATION DATA SENT TO EMERGENCY SERVICE

MOBILE VOICE CALL TO 111 OPERATOR

Emergency Caller Location Information

High precision locations currently provided for approx. 85% of genuine 111 mobile calls

Does not replace voice verification of caller/event location

All mobile phones - location information provided by network operator

Location services will be turned on (if not already) and returned to their original state once location has been sent

Location may not be determinable in all circumstances

Requires network connectivity to make a call

Locations as accurate as an address can be provided through a combination of handset and network location methods

Supports international roaming

Location data is held for 6 hours and then deleted
